COMPANY PROFILE

FSS Fire System Services SA Pty Ltd is an Privately Owned Australian Company.

The Company Intellectual Property consists of three divisions (Fire System Services , National Hydro Cylinder Testing Services , Aviation Fire Systems Australia) assists the company to work in a vast array of the market for private & commercial needs as well as state & federal government needs.

FSS Group of companies combines more than 35 years of safety expertise with state-of-the-art technology and a highly skilled workforce to give customers confidence in their systems.

Fire System Services - Essential Safety Provision Testing

Fire System Services provides servicing of Buildings Essential Safety Provisions. An important provision in Australian Standard AS1851 Routine Service of Fire Protection Systems and Equipment is the need to keep records of the service work carried out as evidence that the systems and equipment are fit to fulfill the intended purpose. Fire System Services uses an asset management software program called FireMate.

Services include: Fire Fighting Equipment, Fire Alarm & Occupant Warning Systems, Fire Sprinkler Systems Exit & Emergency Evacuation Lighting, Electrical Safety Maintenance.

National Hydro Cylinder Testing Services - Hydrostatic & NDT Testing

National Hydro Cylinder Testing Services operates and manages an approved and licensed cylinder test station GCT 720 audited by SAI Global.

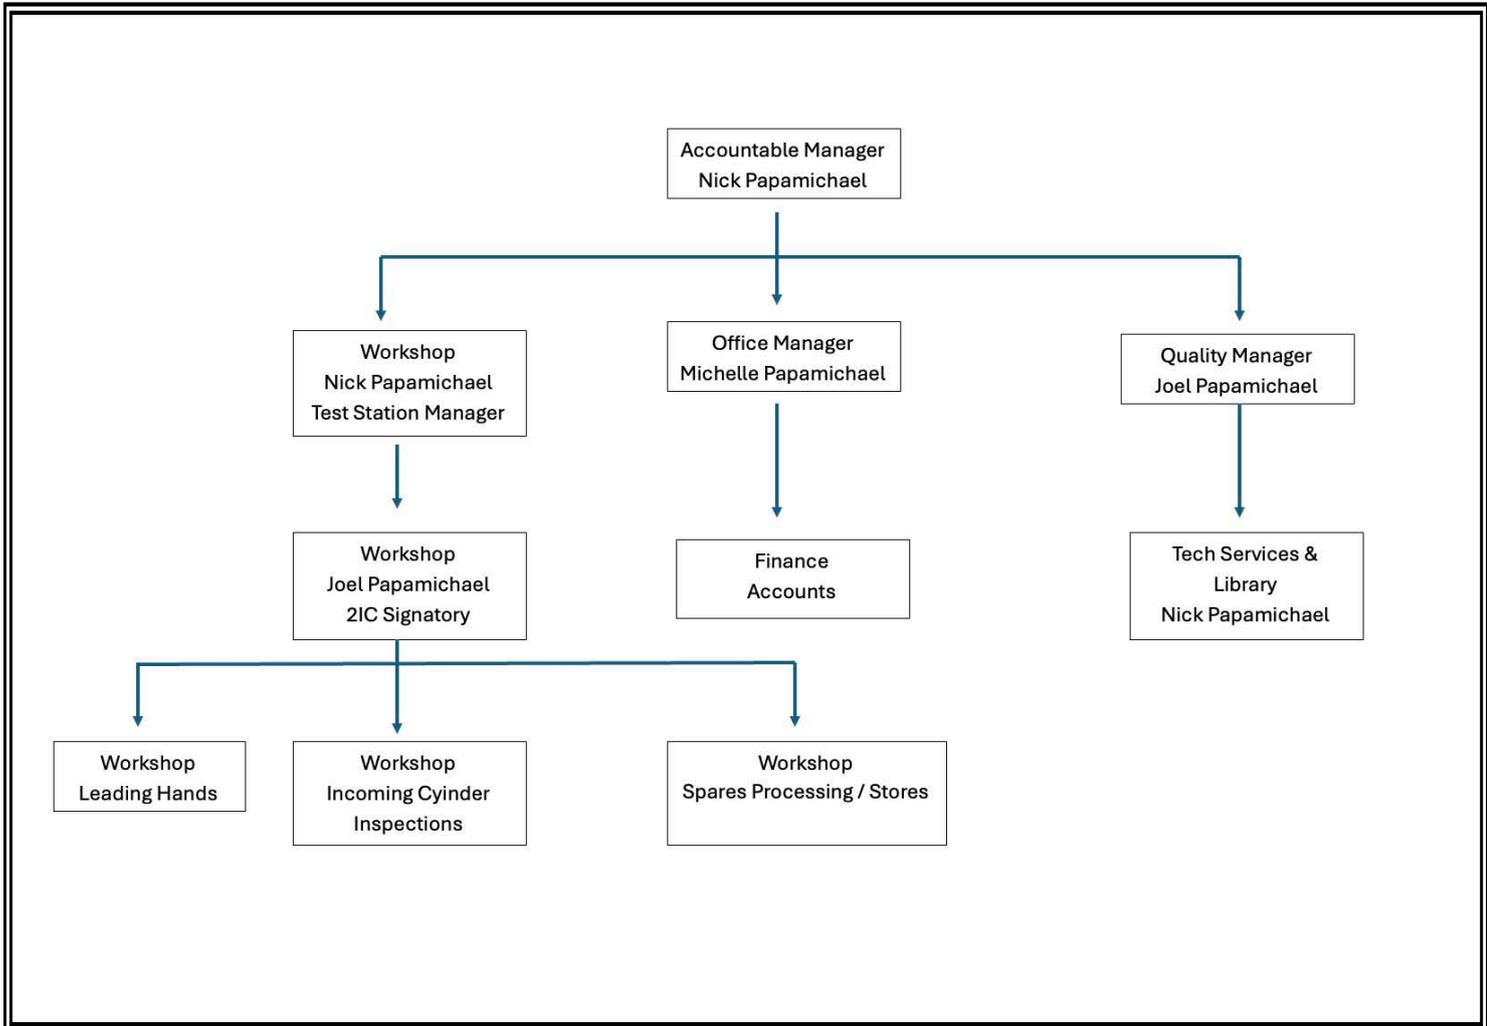

National Hydro Cylinder Testing Services has the capability to hydrostatically test to various pressures. We can test to as low as 1.0 MPA or as high as 100 MPA, with either a Proof Test or a Volumetric Expansion Test.

The station is certified to test the following: Automotive LPG, Composite, Seamless, Welded and Brazed Cylinders.

Aviation Fire Systems Australia - Aircraft Aviation Services

Aviation Fire Systems Australia provides sustainment in the field of aircraft maintenance aviation services involving testing and releasing various aircraft pressurised bottles. Workshop services can range from testing aircraft fire safety cylinders, oxygen life support cylinders, inflation cylinders to structural testing of aviation hydraulic pressure lines.

Every commercial/business aircraft has many pressurised vessels on board. These include oxygen bottles, portable fire extinguishers, emergency air bottles, and engine and APU fire extinguishers. All must be inspected and tested at specific intervals to ensure container strength and integrity.

FSS Company Management Structure

Schedule 1 to Certificate of Approval

Reference Number: CASA.COA.0803 Revision: 2

The following approved activities may be conducted at:

TYPE: MAIN

LOCATION: 100 SOUTH TERRACE, WINGFIELD, SA 5103, AUSTRALIA

1. Maintenance of aircraft airframe components, engines and engine components

(a) Aircraft Pressure Vessels

(i) Compressed Air Gas Cylinders (aluminum seamless construction)

Limitations: Inspection, testing and valve replacement of cylinders

(ii) Helium Gas Cylinders (aluminum seamless construction)

Limitations: Inspection, testing and valve replacement of cylinders

(iii) Nitrogen Gas Cylinders (aluminum seamless construction).

Limitations: Inspection, testing and valve replacement of cylinders.

(b) Emergency equipment

(i) Portable Oxygen cylinders (composite construction)

Limitations: Inspection, testing and valve replacement of cylinders

(ii) Portable fire extinguisher cylinders (aluminium seamless construction)

Limitations: Inspection, testing and refilling of Halatron and CO2 cylinders

2. Maintenance of hot air balloon components

(a) Fuel tanks

(i) Liquefied Petroleum Gas Cylinders (welded stainless-steel construction)

Limitations: Inspection, testing and valve replacement of cylinders.

Dear Sir / Madam

RE: Certificate of Approval (COA): CASA.COA.0803 Revision Initial

I refer to your application for a Certificate of Approval (COA) dated 29 September 2022. The enclosed certificate and the associated schedules have been granted pursuant to sub-regulation 30(2A) of the Civil Aviation Regulations.

Please review your certificate and ensure all information is correct. If any information needs to be changed or you have any questions relating to this document, please e-mail CASA at regservices@casa.gov.au or call 131 757.

Reconciliation of your account has been finalised and there are no adjustments to be made to the initial estimated costs that you have already paid.

If you should require additional information or guidance on any of the above matters, please contact CASA on 131 757.

Yours faithfully

Jonathan Kapper
Regulatory Services Officer
Regulatory Oversight Division

Dear Nick,

This Department acknowledges your correspondence regarding your application for recognition as a Fire Protection Contractor.

On the information presented, your company is accepted as an installer of thermal / smoke automatic fire alarms for connection to Fire Service equipment.

All fire detection and suppression components incorporated into any new or existing fire system connected to and monitored by the SAMFS must be listed in the CSIRO's ActivFire Scheme, Register of Fire Protection Equipment.

All systems are to be installed as per Australian Standard 1670, requirements of the current Building Regulations and any other relevant standards and/or codes.

The SAMFS Fire Safety Department reserves the right to seek confirmation of compliance with AS2118. from an independent organisation.

Please note that our copy of our 'Fire Alarm Conditions of Connection' which are to be complied with, can be down loaded from SAMFS's web site;

www.samfs.sa.gov.au / community policies/ commercial pages.
